

WORR MOTORSPORT ACADEMY

If you are new to karting and eager to begin, our "Karting Growth Division" is tailored for you. Twice weekly over a six-month period, our expert trainers focus on assisting new and inexperienced drivers during quieter and safer track times. You and your child can join us at VKC Vereeniging circuit for a beginner course using a race-ready FIA Homologated kart, receiving thorough training and on-track practice, along with valuable, unbiased advice. We provide race-ready karts and gear for Novice / Intro training for children aged 5 to 22.

The course aims to familiarise young participants with professional karts, providing them with the necessary skills for competitive racing. It offers a structured training program to ensure their full commitment over the six-month duration. This commitment is crucial for parents considering the significant financial investment and time required for such a demanding sport. The course focuses on enhancing safety and building confidence in karting skills, recognising that achieving the status of a South African Champion necessitates years of dedicated training and hard work.

Given the significant costs associated with karting as a sport, the Intro Course offers an opportunity for both your child and yourself to assess whether this pursuit aligns with your interests and aspirations.

At the conclusion of the six-month duration, a decision can be made regarding further investment and officially joining our Team.

WHAT WE OFFER

Basic Training
Twice a week at VKC Vereeniging
Four sessions
Kart supplied for training

Cost of Package:
Contact us for the Academy Pricing
